Classical And Modern Direction Of Arrival Estimation:

Classical and Modern Direction-of-Arrival Estimation T. Engin Tuncer, Benjamin Friedlander, 2009-07-10 Classical and Modern Direction of Arrival Estimation contains both theory and practice of direction finding by the leading researchers in the field This unique blend of techniques used in commercial DF systems and state of the art super resolution methods is a valuable source of information for both practicing engineers and researchers Key topics covered are Classical methods of direction finding Practical DF methods used in commercial systems Calibration in antenna arrays Array mapping fast algorithms and wideband processing Spatial time frequency distributions for DOA estimation DOA estimation in threshold region Higher order statistics for DOA estimation Localization in sensor networks and direct position estimation Brings together in one book classical and modern DOA techniques showing the connections between them Contains contributions from the leading people in the field Gives a concise and easy to read introduction to the classical techniques Evaluates the strengths and weaknesses of key super resolution techniques Includes applications to sensor networks *Academic Press Library in Signal Processing* Mats Viberg, Abdelhak Zoubir, 2013-08-31 This third volume edited and authored by world leading experts gives a review of the principles methods and techniques of important and emerging research topics and technologies in array and statistical signal processing With this reference source you will Quickly grasp a new area of research Understand the underlying principles of a topic and its application Ascertain how a topic relates to other areas and learn of the research issues yet to be resolved Quick tutorial reviews of important and emerging topics of research in array and statistical signal processing Presents core principles and shows their application Reference content on core principles technologies algorithms and applications Comprehensive references to journal articles and other literature on which to build further more specific and detailed knowledge Edited by leading people in the field who through their reputation have been able to commission experts to write on a particular topic

Advances in Electromagnetics Empowered by Artificial Intelligence and Deep Learning Sawyer D. Campbell, Douglas H. Werner, 2023-08-03 Advances in Electromagnetics Empowered by Artificial Intelligence and Deep Learning Authoritative reference on the state of the art in the field with additional coverage of important foundational concepts Advances in Electromagnetics Empowered by Artificial Intelligence and Deep Learning presents cutting edge research advances in the rapidly growing areas in optical and RF electromagnetic device modeling simulation and inverse design The text provides a comprehensive treatment of the field on subjects ranging from fundamental theoretical principles and new technological developments to state of the art device design as well as examples encompassing a wide range of related sub areas The content of the book covers all dielectric and metallodielectric optical metasurface deep learning accelerated inverse design deep neural networks for inverse scattering applications of deep learning for advanced antenna design and other related topics To aid in reader comprehension each chapter contains 10 15 illustrations including prototype photos line graphs and electric field plots Contributed to by leading research groups

in the field sample topics covered in *Advances in Electromagnetics Empowered by Artificial Intelligence and Deep Learning* include Optical and photonic design including generative machine learning for photonic design and inverse design of electromagnetic systems RF and antenna design including artificial neural networks for parametric electromagnetic modeling and optimization and analysis of uniform and non uniform antenna arrays Inverse scattering target classification and other applications including deep learning for high contrast inverse scattering of electrically large structures *Advances in Electromagnetics Empowered by Artificial Intelligence and Deep Learning* is a must have resource on the topic for university faculty graduate students and engineers within the fields of electromagnetics wireless communications antenna RF design and photonics as well as researchers at large defense contractors and government laboratories Industrial Networks and Intelligent Systems Trung Q Duong,Nguyen-Son Vo,2019-01-17 This book constitutes the refereed proceedings of the 4th EAI International Conference on Industrial Networks and Intelligent Systems INISCOM 2018 held in Da Nang Vietnam in August 2018 The 26 full papers were selected from 38 submissions and are organized thematically in tracks Telecommunications Systems and Networks Industrial Networks and Applications Hardware and Software Design and Development Information Processing and Data Analysis Signal Processing Security and Privacy Machine Learning Applications in Electromagnetics and Antenna Array Processing Manel Martínez-Ramón,Arjun Gupta,José Luis Rojo-Álvarez,Christos G. Christodoulou,2021-04-30 This practical resource provides an overview of machine learning ML approaches as applied to electromagnetics and antenna array processing Detailed coverage of the main trends in ML including uniform and random array processing beamforming and detection of angle of arrival antenna optimization wave propagation remote sensing radar and other aspects of electromagnetic design are explored An introduction to machine learning principles and the most common machine learning architectures and algorithms used today in electromagnetics and other applications is presented including basic neural networks gaussian processes support vector machines kernel methods deep learning convolutional neural networks and generative adversarial networks Applications in electromagnetics and antenna array processing that are solved using machine learning are discussed including antennas remote sensing and target classification **Proceedings of the 5th International Conference on Electrical Engineering and Information Technologies for Rail Transportation (EITRT) 2021** Jianying Liang,Limin Jia,Yong Qin,Zhigang Liu,Lijun Diao,Min An,2022-02-18 This book reflects the latest research trends methods and experimental results in the field of electrical and information technologies for rail transportation which covers abundant state of the art research theories and ideas As a vital field of research that is highly relevant to current developments in a number of technological domains the subjects it covered include intelligent computing information processing communication technology automatic control etc The objective of the proceedings is to provide a major interdisciplinary forum for researchers engineers academicians and industrial professionals to present the most innovative research and development in the field of rail transportation electrical and information

technologies Engineers and researchers in academia industry and government will also explore an insightful view of the solutions that combine ideas from multiple disciplines in this field The volumes serve as an excellent reference work for researchers and graduate students working on rail transportation and electrical and information technologies

Non-standard Antennas François Le Chevalier, Dominique Lesselier, Robert Staraj, 2013-01-09 This book aims at describing the wide variety of new technologies and concepts of non standard antenna systems reconfigurable integrated terahertz deformable ultra wideband using metamaterials or MEMS etc and how they open the way to a wide range of applications from personal security and communications to multifunction radars and towed sonars or satellite navigation systems with space time diversity on transmit and receive A reference book for designers in this lively scientific community linking antenna experts and signal processing engineers

Innovations and Advances in Computer, Information, Systems Sciences, and Engineering Khaled Elleithy, Tarek Sobh, 2012-08-28 Innovations and Advances in Computer Information Systems Sciences and Engineering includes the proceedings of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2011 The contents of this book are a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Industrial Electronics Technology and Automation Telecommunications and Networking Systems Computing Sciences and Software Engineering Engineering Education Instructional Technology Assessment and E learning

IoT and Spacecraft Informatics K.L. Yung, Andrew W. H. IP, Fatos Khafa, K.K. Tseng, 2022-03-29 IoT and Spacecraft Informatics provides the theory and applications of IoT systems in the design development and operation of spacecraft Sections present a high level overview of IoT and introduce key concepts needed to successfully design IoT solutions key technologies protocols and technical building blocks that combine into complete IoT solutions The book features the latest advances findings and state of the art in research case studies development and implementation of IoT technologies for spacecraft and space systems In addition it concentrates on different aspects and techniques to achieve automatic control of spacecraft This book is for researchers PhD students engineers and specialists in aerospace engineering as well as those in computer science computer engineering or mechatronics Presents state of the art research on IoT and spacecraft technology Provides artificial intelligence based solutions and robotics for space exploration applications Introduces new applications and case studies of IoT and spacecraft informatics
