considered based on international instruments and disputes across international courts and tribunals. Later chapters provide illustrative examples of legal instruments and regimes that address the 169 targets in relation to the 17 Global Sustainable Development Goals. Finally, the authors propose cutting edge research agendas and conclude by exploring the limits of sustainable development. Sustainable Development Law is designed as a high level textbook examining the nature of law of sustainable development. Chapters offer key takeaways and questions to consider for those studying the subject. It also would be suitable for practising lawyers and policy makers who want to develop their understanding of the subject area.

Climate Change and International Trade Rafael Leal-Arcas, 2013-01-01. Rafael Leal Arcas expertly examines the interface of climate change mitigation and international trade law with a view to addressing the question: How can we make best use of the international trading system experience to aim at a global climate change agreement? The insightful book contributes to developing the architecture for a post 2012 global climate agreement and in doing so seeks and proposes new approaches to climate change mitigation by linking it to the international trade system. The author suggests the adoption of a bottom up approach to climate change negotiations by using the evolution of multilateral trade agreements as a model for reaching a global climate treaty. He discusses the innovative approach of inserting climate goals within regional trade agreements given their proliferation, especially bilateral, in the international trading system. He explains the trade implications of climate change mitigation policies by analyzing a couple of areas where the international regimes for trade and climate change mitigation may potentially clash. *Climate Change and International Trade* will strongly appeal to undergraduate and graduate students of international and European trade law, international and European environmental law, as well as social science academics. NGOs, think tanks, practitioners, researchers, and international organizations will also find plenty of valuable information in this timely resource.

Hague Yearbook of International Law / Annuaire de La Haye de Droit International, Vol. 23 (2010) Nikos Lavranos, Ruth A. Kok, 2019-03-25. The title of the Hague Yearbook of International Law reflects the close ties which have always existed between the AAA and the City of The Hague with its international law institutions and indicates the Yearbook's aim of devoting attention to developments taking place in the international law institutions based in The Hague. However, the Yearbook has a broader scope as well to offer a platform for review of new developments in the field of international law. As of the 2010 Volume, the Yearbook will be compiled by a new and expanded Editorial Board offering fresh ideas and a new approach. A newly established Advisory Board has also been added, including ICJ Judge Bruno Simma, Serge Brammertz, Prosecutor of the International Criminal Tribunal for the Former Yugoslavia, ICTY, Jacomijn J. van Haersolte van Hof, advocate, advocaat at HaersolteHof and arbitrator, The Netherlands, and Professor Peter Hilpold, Innsbruck University, Austria. Sections have been created on public international law, private international law, international investment law, and international criminal law, containing in depth articles on current issues. The breadth of the Yearbook's content thus offers an interesting and valuable illustration of the dynamic developments in the various sub areas.

of international law **Legal Aspects of Carbon Trading** David Freestone,Charlotte Streck,2009-10 Since 2005 the carbon market has grown to nearly 100 billion per annum This new book examines all the main legal issues which are raised by this explosion of what is now called carbon finance It covers not only the Kyoto Flexibility Mechanisms but also the EU Emissions Trading Scheme ETS that is in the process of reform and other national and voluntary schemes The Parties to the 1992 UN Framework Convention are in the process of negotiating a successor regime to the 1997 Kyoto Protocol whose commitment period ends in 2012 As scientists predict that the threat of dangerous climate change requires much more radical mitigation actions the negotiations aim for a more comprehensive and wide ranging agreement which includes new players such as the US as well as taking account of new sources such as aircraft emissions and new mechanisms such as Reducing Emissions through Deforestation and Degradation REDD This volume will cover the legal aspects of these This volume builds on the success of the editors previous volume published by OUP in 2005 Legal Aspects of Implementing the Kyoto Protocol Mechanisms Making Kyoto Work which remains the standard work of reference for legal practitioners and researchers on carbon finance and trading under the Kyoto Protocol **Handbook of Low Carbon Concrete** Ali Nazari,Jay G.
