Climate Change And The Oceans:

Climate Change Impacts on Ocean and Coastal Law Randall S. Abate, 2014-12-30 Ocean and coastal law has grown rapidly in the past three decades as a specialty area within natural resources law and environmental law. The protection of oceans has received increased attention in the past decade because of sea level rise, ocean acidification, the global overfishing crisis, widespread depletion of marine biodiversity such as marine mammals and coral reefs, and marine pollution. Paralleling the growth of ocean and coastal law, climate change regulation has emerged as a focus of international environmental diplomacy and has gained increased attention in the wake of disturbing and abrupt climate change related impacts throughout the world that have profound implications for ocean and coastal regulation and marine resources. *Climate Change Impacts on Ocean and Coastal Law* effectively unites these two worlds. It raises important questions about whether and how ocean and coastal law will respond to the regulatory challenges that climate change presents to resources in the oceans and coasts of the U.S. and the world. This comprehensive work assembles the insights of global experts from academia and major NGOs, e.g., Center for International Environmental Law, Ocean Conservancy, and Environmental Law Institute, to address regulatory challenges from the perspectives of U.S. law, foreign domestic law, and international law. **The Effects of**

Climate Change on the Oceans Natalie Hyde, 2020-08-31 Climate change is one of the most serious threats to the world's oceans, causing ecosystem damage, coastal erosion, and ocean acidification. This necessary title explores these effects and the worldwide efforts to reduce them. From youth leaders to global organizations, learn how people work together to protect the oceans from the effects of climate change and get motivated to take action in your community. **Oceans and Climate Change** Echo Elise Gonzalez, Edward Ricciutti, 2019-04-05 Explains the effect that climate change is having on the oceans, including melting sea ice, rising sea levels, and its affect on marine life. Includes glossary, additional resources, and index.

The State of Our Oceans and the Impact of Climate Change Signe B. Kristoffersen, 2020-05-29 Chapter 1 is focused on oceans and the coastal communities that depend on them. 40 percent of the United States is living in coastal shoreline counties. These communities depend on ocean-related industries like fisheries, tourism, and shipping. Businesses and jobs directly dependent on oceans and Great Lakes resources contribute 352 billion to our GDP. They employ over 3 million Americans. But even if you live far from the coast, the health of oceans should matter to you. It affects the air we breathe, it affects the food we eat, and the livability of our climate. The purpose of chapter 2 is to explore the impacts of anthropogenic carbon dioxide emissions on our oceans and coasts. This chapter discusses warming, acidification, deoxygenation, and sea level rise, with special attention to findings in recently published significant climate reports and the impacts of climate change to a coastal industry. **Climate Change and the Oceans** Robin Warner, Clive H. Schofield, 2012-01-01 *Climate Change and the Oceans* investigates the effects of climate change on the ocean environment and its implications for maritime activities both globally and within the Asia Pacific region. This detailed work draws together informed opinion from a range of disciplines to
