Progress Report of the Foot-and-Mouth Disease Research Committee Great Britain. Foot-and-Mouth Disease Research Committee,1925 **Linear Algebra** Ward Cheney,David Kincaid,2012 Ward Cheney and David Kincaid have developed Linear Algebra Theory and Applications Second Edition a multi faceted introductory textbook which was motivated by their desire for a single text that meets the various requirements for differing courses within linear algebra For theoretically oriented students the text guides them as they devise proofs and deal with abstractions by focusing on a comprehensive blend between theory and applications For application oriented science and engineering students it contains numerous exercises that help them focus on understanding and learning not only vector spaces matrices and linear transformations but uses of software tools available for use in applied linear algebra Using a flexible design it is an ideal textbook for instructors who wish to make their own choice regarding what material to emphasis and to accentuate those choices with homework assignments from a large variety of exercises both in the text and online Fixing Law Schools Benjamin H. Barton,2019-12-17 An urgent plea for much needed reforms to legal education The period from 2008 to 2018 was a lost decade for American law schools Employment results were terrible Applications and enrollment cratered Revenue dropped precipitously and several law schools closed Almost all law schools shrank in terms of students faculty and staff A handful of schools even closed Despite these dismal results law school tuition outran inflation and student indebtedness exploded creating a truly toxic brew of higher costs for worse results The election of Donald Trump in 2016 and the subsequent role of hero lawyers in the resistance has made law school relevant again and applications have increased However despite the strong early returns we still have no idea whether law schools are out of the woods or not If the Trump Bump is temporary or does not result in steady enrollment increases more schools will close But if it does last we face another danger We tend to hope that crises bring about a process of creative destruction where a downturn causes some businesses to fail and other businesses to adapt And some of the reforms needed at law schools are obvious tuition fees need to come down teaching practices need to change there should be greater regulations on law schools that fail to deliver on employment and bar passage Ironically the opposite has happened for law schools they suffered a harrowing near death experience and the survivors look like they re going to exhale gratefully and then go back to doing exactly what led them into the crisis in the first place The urgency of this book is to convince law school stakeholders faculty students applicants graduates and regulators not to just return to business as usual if the Trump Bump proves to be permanent We have come too far through too much to just shrug our shoulders and move on Law and Technology Nanci K. Carr,2024-09-26 Technology is an important part of our everyday lives Whether we ask Alexa to start the coffee machine or check our phones for the traffic report we increasingly interact with technology As much as we may enjoy and rely upon technology it is not without its challenges including the inability of the law to keep pace with technological developments and the ethical issues

that arise For example tort law is impacted by technology the proliferation of drones requires a new look at the law of trespass and video Zoom meetings can impose direct liability on employers for example Social media supports an increasing share of all advertising and endorsements and is subject to regulation of which influencers are often not aware Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law In the United States the right of publicity is governed by state rather than federal law so there is no uniform approach One part of the book includes a survey of the law of each US state and proposes a new federal statute Although most of the examples are drawn from the US the issues raised are fully international in scope and relevance This book will appeal to legal practitioners trying to manage new technology issues facing their clients academics teaching students how the law is changing and needs to continue to change as technology develops and teachers and researchers in business and management schools needing to address technology and governance issues
