Climate Change, Resilience and Cultural Heritage Mehrnaz Rajabi, 2024-09-16 This book showcases the cross disciplinary and systemic relationships among climate change resilience and cultural heritage It critically reviews the contemporary international documents and scholarly debates of the climate science disaster risk management and heritage fields and reveals that within the comprehensive point of view the potential and advances in one field could be instrumentalized in other fields Moreover it provides tailor made considerations and practical recommendatory encounters toward resilient cultural heritage in facing climate change as a disaster risk driver Lastly the book highlights the significance of the cultural dimension of climate change as well as the global landscape of systemic risk while redefining a new comprehensive and holistic definition of resilience for the heritage field

Climate Change and Cultural Heritage Peter F. Smith, 2013-08-15 History reveals how civilisations can be decimated by changes in climate More recently modern methods of warfare have exposed the vulnerability of the artefacts of civilisation Bringing together a range of subjects from science energy and sustainability to aesthetics theory and civilization theory this book uniquely deals with climate change and the ensuing catastrophes in relation to cultural factors urbanism and architecture It links the evolution of civilisation with special emphasis on the dynamics of beauty as displayed in architecture and urbanism to climate change It then considers both the historic and predicted impacts of climate change and the threat it poses to the continued viability of human civilisation when survival is the top priority This book gives students researchers and professionals in architecture and sustainable design as well as anyone interested in the threat of global warming to civilisation new insights as to what could be lost if action is not taken at a global level
