Climate Cover Up The Crusade To Deny Global Warming:

Climate Cover-up James Hoggan, 2010 This is a story of betrayal selfishness greed and irresponsibility on an epic scale Hoggan examines the public relations circus that surrounds global warming and uncovers the organized campaign largely financed by the coal and oil industries to make us think that climate science is still somehow controversial **Respecting Truth** Lee McIntyre, 2015-06-05 Throughout history humans have always indulged in certain irrationalities and held some fairly wrong headed beliefs But in his newest book philosopher Lee McIntyre shows how we've now reached a watershed moment for ignorance in the modern era due to the volume of misinformation the speed with which it can be digitally disseminated and the savvy exploitation of our cognitive weaknesses by those who wish to advance their ideological agendas In *Respecting Truth Willful Ignorance in the Internet Age* McIntyre issues a call to fight back against this slide into the witless abyss In the tradition of Galileo the author champions the importance of using tested scientific methods for arriving at true beliefs and shows how our future survival is dependent on a more widespread reasonable world *Reality Check* Donald R. Prothero, 2018-11-01 A thought provoking look at science denialism for popular science readers who want better to be able to explain and defend science and scientific methods to others Library Journal The battles over evolution climate change childhood vaccinations and the causes of AIDS alternative medicine oil shortages population growth and the place of science in our country all are reaching a fevered pitch Many people and institutions have exerted enormous efforts to misrepresent or flatly deny demonstrable scientific reality to protect their nonscientific ideology their power or their bottom line To shed light on this darkness Donald R Prothero explains the scientific process and why society has come to rely on science not only to provide a better life but also to reach verifiable truths no other method can obtain He describes how major scientific ideas that are accepted by the entire scientific community evolution anthropogenic global warming vaccination the HIV cause of AIDS and others have been attacked with totally unscientific arguments and methods Prothero argues that science deniers pose a serious threat to society as their attempts to subvert the truth have resulted in widespread scientific ignorance increased risk of global catastrophes and deaths due to the spread of diseases that could have been prevented Prothero's treatise will give the science minded something to cheer about a brief summary of the real data that supports so many critical aspects of modern life Publishers Weekly *Issues in Peace and Conflict Studies* CQ Researcher, 2010-10-12 Key Features *The Carbon Farming Solution* Eric Toensmeier, 2016 Agriculture is rightly blamed as a major culprit of our climate crisis But in this groundbreaking new book Eric Toensmeier argues that agriculture specifically the subset of practices known as carbon farming can and should be a linchpin of a global climate solutions platform **Judaism and Global Survival** Richard Schwartz, 2023-08-15 Judaism and Global Survival discusses the challenges facing humanity and the Jewish teachings related to these challenges in order to galvanize Jews to help repair the world tikkun olam as required by Jewish law It argues that we don't need to discover new values and approaches to address

current global threats What is needed is a rediscovery and application of basic Jewish teachings and mandates such as to pursue peace and justice to love our neighbors as ourselves and to act as co workers with God in protecting and preserving the world Judaism and Global Survival is meant to be a wake up call the strongest that one can make on the urgency of addressing climate threats and other environmental threats and the importance of Jews applying Jewish values in addressing these threats Among the issues discussed in the book are the following Jews are to guardians of the earth partners and co workers with God in working toward tikkun olam the healing repair and proper transforming of the world climate change is an existential threat to the world and the only hope to avert a climate catastrophe is through a major shift to plant based diets as that would enable reforestation of the vast areas now used for animal agriculture reducing atmospheric CO2 to a much safer level vegetarianism and even more so veganism is the diet most consistent with Jewish teachings on preserving our health treating animals with compassion protecting the environment conserving natural resources and helping hungry people

American Zoo David Grazian, 2017-12-05 A close up look at the contradictions and wonders of the modern zoo Orangutans swing from Kevlar lined fire hoses Giraffes feast on celebratory birthday cakes topped with carrots instead of candles Hi tech dinosaur robots growl among steel trees while owls watch animated cartoons on old television sets In American Zoo sociologist David Grazian takes us on a safari through the contemporary zoo alive with its many contradictions and strange wonders Trading in his tweed jacket for a zoo uniform and a pair of muddy work boots Grazian introduces us to zookeepers and animal rights activists parents and toddlers and the other human primates that make up the zoo's social world He shows that in a major shift away from their unfortunate pasts American zoos today emphasize naturalistic exhibits teeming with lush and immersive landscapes breeding programs for endangered animals and enrichment activities for their captive creatures In doing so zoos blur the imaginary boundaries we regularly use to separate culture from nature humans from animals and civilization from the wild At the same time zoos manage a wilderness of competing priorities animal care education scientific research and recreation all while attempting to serve as centers for conservation in the wake of the current environmental and climate change crisis The world of the zoo reflects how we project our own prejudices and desires onto the animal kingdom and invest nature with meaning and sentiment A revealing portrayal of comic animals delighted children and feisty zookeepers American Zoo is a remarkable close up exploration of a classic cultural attraction

How Climate Change Comes to Matter Candis Callison, 2014-02-15 A rich ethnographic account describing the processes by which climate change comes to matter collectively and individually and how vernacular explanations of climate change reflect diverse ways of knowing and caring about the world

The United States in a Warming World Thomas L. Brewer, 2015 Balanced factual and conceptual analysis of the political and economic factors that shape the United States responses to climate change

Climate Change Geoengineering Wil C. G. Burns, Andrew L. Strauss, 2013-07-22 The international community is not taking the action necessary to avert dangerous increases in greenhouse gases Facing a potentially bleak

future the question that confronts humanity is whether the best of bad alternatives may be to counter global warming through human engineered climate interventions In this book eleven prominent authorities on climate change consider the legal policy and philosophical issues presented by geoengineering The book asks when if ever are decisions to embark on potentially risky climate modification projects justified If such decisions can be justified in a world without a central governing authority who should authorize such projects and by what moral and legal right If states or private actors undertake geoengineering ventures absent the blessing of the international community what recourse do the rest of us have
