Causality in Macroeconomics Kevin D. Hoover, 2001-08-13 First published in 2001 Causality in Macroeconomics addresses the long standing problems of causality while taking macroeconomics seriously The practical concerns of the macroeconomist and abstract concerns of the philosopher inform each other Grounded in pragmatic realism the book rejects the popular idea that macroeconomics requires microfoundations and argues that the macroeconomy is a set of structures that are best analyzed causally Ideas originally due to Herbert Simon and the Cowles Commission are refined and generalized to non linear systems particularly to the non linear systems with cross equation restrictions that are ubiquitous in modern macroeconomic models with rational expectations with and without regime switching These ideas help to clarify philosophical as well as economic issues The structural approach to causality is then used to evaluate more familiar approaches to causality due to Granger LeRoy and Glymour Spirtes Scheines and Kelly as well as vector autoregressions the Lucas critique and the exogeneity concepts of Engle Hendry and Richard

The Methodology of Empirical Macroeconomics Kevin D. Hoover, 2001-10-11 The Methodology of Empirical Macroeconomics stakes out a pragmatic middle ground between traditional prescriptive economic methodology and recent descriptive sociological or rhetorical methodology The former is sometimes seen as arrogantly telling economists how to do their work and the latter as irrelevant to their practice The lectures are built around a case study of a concrete example of macroeconomic analysis They demonstrate that economic methodology and the philosophy of science offer insights that help to resolve the genuine concerns of macroeconomists Some examples of questions addressed include What is the relationship between theoretical models and empirical observations What is the relevance of macroeconomics to policy Should macroeconomics be viewed as a special case of microeconomics What is the place of long standing philosophical issues in macroeconomics such as the scope and nature of economic laws the role of idealizations methodological individualism and the problem of causality
