Common Sense Reasoning And Rationality New Directions In Cognitive Science:

Common Sense, Reasoning, & Rationality Renée Elio, 2002 While common sense and rationality have often been viewed as two distinct features in a unified cognitive map this volume engages with this notion and comes up with novel and often paradoxical views of this relationship

Common Sense, Reasoning, & Rationality Renée Elio, 2002 While common sense and rationality have often been viewed as two distinct features in a unified cognitive map this volume engages with this notion and comes up with novel and often paradoxical views of this relationship

Common Sense, Reasoning, and Rationality Renee Elio, 2002-02-07 As the eleventh volume in the New Directions in Cognitive Science series formerly the Vancouver Studies in Cognitive Science series this work promises superb scholarship and interdisciplinary appeal It addresses three areas of current and varied interest common sense reasoning and rationality While common sense and rationality often have been viewed as two distinct features in a unified cognitive map this volume offers novel even paradoxical views of the relationship Comprised of outstanding essays from distinguished philosophers it considers what constitutes human rationality behavior and intelligence covering diverse areas of philosophy psychology cognitive science and computer science Indeed it is at the forefront of cognitive research and promises to be of unprecedented influence across numerous disciplines

Rationality and the Reflective Mind Keith Stanovich, 2011-02-03 In this book Keith Stanovich attempts to resolve the Great Rationality Debate in cognitive science the debate about how much irrationality to ascribe to human cognition Stanovich shows how the insights of dual process theory and evolutionary psychology can be combined to explain why humans are sometimes irrational even though they possess cognitive machinery of remarkable adaptiveness Using a unique individual differences approach Stanovich shows that to fully characterize differences in rational thinking the traditional System 2 of dual process theory must be partitioned into the reflective mind and the algorithmic mind Using a new tripartite model of mind Stanovich shows how rationality is a more encompassing construct than intelligence when both are properly defined and that IQ tests fail to assess individual differences in rational thought Stanovich discusses the types of thinking processes that would be measured in an assessment of rational thinking

Reference Jeanette K. Gundel, Nancy Hedberg, 2008-01-29 The ability to produce and understand referring expressions is basic to human language use and human cognition Reference comprises the ability to think of and represent objects both real and imagined fictional to indicate to others which of these objects we are talking about and to determine what others are talking about when they use a nominal expression The articles in this volume are concerned with some of the central themes and challenges in research on reference within the cognitive sciences philosophy including philosophy of language and mind logic and formal semantics theoretical and computational linguistics and cognitive psychology The papers address four basic questions What is reference What is the appropriate analysis of different referring forms such as definite descriptions How is reference resolved and How do speaker writers select appropriate referring forms such as pronouns vs full noun phrases demonstrative vs personal

pronouns and overt vs null zero pronominal forms Some of the papers assume and build on existing theories such as Centering Theory and the Givenness Hierarchy framework others propose their own models of reference understanding or production The essays examine reference from a number of disciplinary and interdisciplinary perspectives informed by different research traditions and employing different methodologies While the contributors to the volume were primarily trained in one of the four represented disciplines computer science linguistics philosophy and psychology and use methodologies typical of that discipline each of them bridges more than one discipline in their methodology and or their approach
