variety of research fields including discourse analysis sociolinguistics communication and media studies education and design In celebration of his illustrious research career this volume brings together a group of leading and emerging scholars in these fields to review explore and advance two central research agendas set out by van Leeuwen the categorisation of the meaning potential of various semiotic resources and the examination of their uses in different forms of communication and the critical analysis of the interaction between semiotic forms norms and technology in discursive practices Through 11 cutting edge research papers and an experimental visual essay the book investigates a broad range of semiotic resources including touch sound image texture and discursive practices such as community currency fitness regime film scoring and commodity upcycling The book showcases how social semiotics and multimodality can provide insights into the burning issues of the day such as global neoliberalism terrorism consumerism and immigration Multimodality in the Built Environment Louise J. Ravelli, Robert J. McMurtrie, 2015-11-19 This book provides an extended exploration of the multimodal analysis of spatial three dimensional texts of the built environment culminating in a holistic approach termed Spatial Discourse Analysis SpDA Based on existing frameworks of multimodal analysis this book applies adapts and extends these frameworks to spatial texts The authors argue that choices in spatial design create meanings about what we perceive and how we can or should behave within spatial texts influence how we feel in and about those spaces and enable these texts to function as coherent wholes Importantly a spatial text once built is also a resource which is then used and an essential aspect of understanding these texts is to consider what users themselves contribute to the meaning potential of these texts The book takes the metafunctional approach familiar from Systemic Functional Linguistics SFL and foregrounds each metafunction in turn textual interpersonal experiential and logical in relation to the detailed analysis of a particular spatial text
