Cometasteroid Impacts And Human Society An Interdisciplinary Approach:

Comet/Asteroid Impacts and Human Society Peter T. Bobrowsky, Hans Rickman, 2007-06-10 Leading specialists in various disciplines were first invited to a multidisciplinary workshop funded by ICSU on the topic to gain a better appreciation and perspective on the subject of comet asteroid impacts as viewed by different disciplines This volume provides a necessary link between various disciplines and comet asteroid impacts

New Natures Dolly Jørgensen, Finn Arne Jørgensen, Sara B. Pritchard, 2013-07-08 New Natures broadens the dialogue between the disciplines of science and technology studies STS and environmental history in hopes of deepening and even transforming understandings of human nature interactions The volume presents richly developed historical studies that explicitly engage with key STS theories offering models for how these theories can help crystallize central lessons from empirical histories facilitate comparative analysis and provide a language for complicated historical phenomena Overall the collection exemplifies the fruitfulness of cross disciplinary thinking The chapters follow three central themes ways of knowing or how knowledge is produced and how this mediates our understanding of the environment constructions of environmental expertise showing how expertise is evaluated according to categories categorization hierarchies and the power afforded to expertise and lastly an analysis of networks mobilities and boundaries demonstrating how knowledge is both diffused and constrained and what this means for humans and the environment Contributors explore these themes by discussing a wide array of topics including farming forestry indigenous land management ecological science pollution trade energy and outer space among others The epilogue by the eminent environmental historian Sverker Sorlin views the deep entanglements of humans and nature in contemporary urbanity and argues we should preserve this relationship in the future Additionally the volume looks to extend the valuable conversation between STS and environmental history to wider communities that include policy makers and other stakeholders as many of the issues raised can inform future courses of action

Imagining Outer Space Alexander C.T. Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age

Geophysical Hazards Tom Beer, 2010-06-25 The International Year of Planet Earth IYPE was established as a means of raising worldwide public and political awareness of the vast though frequently under used potential the Earth Sciences

possess for improving the quality of life of the peoples of the world and safeguarding Earth's rich and diverse environments. The International Year project was jointly initiated in 2000 by the International Union of Geological Sciences (IUGS) and the Earth Science Division of the United Nations Educational, Scientific and Cultural Organisation (UNESCO). IUGS, which is a Non-Governmental Organisation, and UNESCO, an Inter-Governmental Organisation, already shared a long record of productive cooperation in the natural sciences and their application to societal problems, including the International Geoscience Programme (IGCP) now in its fourth decade. With its main goals of raising public awareness of and enhancing research in the Earth sciences on a global scale in both the developed and less developed countries of the world, two operational programmes were demanded. In 2002 and 2003, the Series Editors together with Dr Ted Nield and Dr Henk Schalke, all four being core members of the Management Team at that time, drew up outlines of a Science and an Outreach Programme. In 2005, following the UN proclamation of 2008 as the United Nations International Year of Planet Earth, the Year grew into a triennium (2007-2009).

Dynamics of Disasters—Key Concepts, Models, Algorithms, and Insights Ilias S. Kotsireas, Anna Nagurney, Panos M. Pardalos, 2016-11-21. This volume results from the Second International Conference on Dynamics of Disasters held in Kalamata, Greece, June 29-July 2, 2015. The conference covered particular topics involved in natural and man-made disasters such as war, chemical spills, and wildfires. Papers in this volume examine the finer points of disasters through Critical infrastructure protection, Resiliency, Humanitarian logistic, Relief supply chains, Cooperative game theory, Dynamical systems, Decision making under risk and uncertainty, Spread of diseases, Contagion, Funding for disaster relief, Tools for emergency preparedness, Response and risk mitigation. Multi-disciplinary theories, tools, techniques, and methodologies are linked with disasters from mitigation and preparedness to response and recovery. The interdisciplinary approach to problems in economics, optimization, government management, business, humanities, engineering, medicine, mathematics, computer science, behavioral studies, emergency services, and environmental studies will engage readers from a wide variety of fields and backgrounds.

Of Risks and Normative Responses Christina Anikó Simmig, 2023-09-23. Disaster losses in the context of natural hazards continue to rise despite a growing understanding of disaster risks and measures to reduce them. One obstacle to enhancing private and public disaster risk reduction is the influence of the distorted risk perception of laypeople. The book argues for the necessity of public regulations and explores means to mitigate the consequences of such distorted risk perception through legal measures and adjustments to political decision making in Council of Europe member states while respecting the value of autonomy and democratic principles. In terms of collective decision making, the book advocates for the implementation of deliberative fora in the democratic decision making process to mitigate the influence of distorted risk perception associated with natural hazards. Additionally, the book discusses a range of disaster risk reducing measures that member states may lawfully implement to protect individuals and communities from the consequences of distorted risk perceptions related to common natural hazards. To underscore the merits of strengthening disaster risk reduction from the

bottom up this book demonstrates how fundamental rights and democratic values impede attempts to increase DRR from the top down even in cases where people's risk perceptions are distorted In doing so the book addresses the issue of disaster risk reduction in a novel way by exposing how legal and political barriers to disaster loss reduction can be overcome by giving higher priority to mitigating distorted risk perceptions Asteroids Viorel Badescu,2013-07-03 The Earth has limited material and energy resources while these resources in space are virtually unlimited Further development of humanity will require going beyond our planet and exploring of extraterrestrial resources and sources of unlimited power Thus far all missions to asteroids have been motivated by scientific exploration However given recent advancements in various space technologies mining asteroids for resources is becoming ever more feasible A significant portion of asteroids value is derived from their location the required resources do not need to be lifted at a great expense from the surface of the Earth Resources derived from Asteroid not only can be brought back to Earth but could also be used to sustain human exploration of space and permanent settlements in space This book investigates asteroids prospective energy and material resources It is a collection of topics related to asteroid exploration and utilization It presents past and future technologies and solutions to old problems that could become reality in our life time The book therefore is a great source of condensed information for specialists involved in current and impending asteroid related activities and a good starting point for space researchers inventors technologists and potential investors Written for researchers engineers and businessmen interested in asteroids exploration and exploitation Keywords Asteroids Asteroid exploration Asteroid exploitation Energy sources Space Resources Material Resources In Situ Resource Utilization Mining *The Routledge Companion to Media and Risk* Bishnupriya Ghosh,Bhaskar Sarkar,2020-02-26 This collection presents new work in risk media studies from critical humanities perspectives Defining historicizing and consolidating current scholarship the volume seeks to shape an emerging field signposting its generative insights while examining its implicit assumptions When and under what conditions does risk emerge How is risk mediated Who are the targets of risk media Who manages risk Who lives with it Who are most in danger Such questions the what how who when and why of risk media inform the scope of this volume With roots in critical media studies and science and technology studies it hopes to inspire new questions perspectives frameworks and analytical tools not only for risk media and communication studies but also for social and cultural theories Editors Bishnupriya Ghosh and Bhaskar Sarkar bring together contributors who elucidate and interrogate risk media's varied histories and futures This book is meant for students and scholars of media and communication studies science and technology studies and the interdisciplinary humanities looking either to deepen their engagement with risk media or to broaden their knowledge of this emerging field **A Story of More Than 5000 Worlds** Dr. Alejandro Ruiz Rivera,2024-08-02 Immerse yourself on an interstellar journey through A Story of More than 5000 Worlds as it explores the fascinating story of celestial discovery and the enduring quest of researchers and scientists to find life beyond Earth This comprehensive book navigates the intricacies

of star and planet formation shedding light on the enigmatic life cycle of stars like our Sun to pulsars and black holes and the dynamic processes that define the fate of planets Marvel at the ingenuity of exoplanet detection methods from the accurate detection of stellar wobbles to the precise monitoring of starlight dimming during transits and peer into the future with innovative techniques that take advantage of the deformation or curvature of the space time caused by massive objects The classification of these distant worlds from rocky planets to gas giants lays the groundwork for the book s climax the search for life Exploring biosignatures and technosignatures from the organic and chemical traces of potential life to the echoes of advanced technological civilizations this book expands our understanding of the dynamicity of the universe and our place within it It s an invitation to ponder humanity s greatest question are we alone while navigating through the Drake Equation and other Search for Extraterrestrial Intelligence SETI concepts and the silence that has prompted ideas like the Fermi Paradox and the Great Filter The book in addition to acting as an engaging read for anyone interested in these subjects and given the number of topics included and the breadth of the discussions could also be used as a complementary textbook for students at both high school and non science bachelor levels in introductory or fundamental astronomy courses **Space**

Ethics Brian Patrick Green, 2021-10-19 Throughout history humans have explored new places making both good and bad moral decisions along the way As humanity proceeds to explore space it is important that we learn from the successes and not repeat the mistakes of the past This book provides the first comprehensive introduction to ethics as it applies to space exploration and use It examines real world case studies that exemplify the ethical challenges we face in exploring beyond Earth space debris militarization in space hazardous asteroids planetary protection the search for extraterrestrial life commercial and private sector activities in space space settlements very long duration missions and planetary scale interventions Major themes include human health environmental concerns safety and risk governance and decision making and opportunities and challenges of multidisciplinary and international contexts Ideal for classroom use and beyond the book provides ways of thinking that will help students academics and policymakers examine the full range of ethical decisions on questions related to space exploration
