Complexity Tax Simplification Experiences Around:

The Complexity of Tax Simplification Simon James, Adrian Sawyer, Tamer Budak, 2016-04-29 Simplicity in taxation has considerable potential advantages However attempts to simplify tax systems are only likely to be successful and enduring if they take account of the reasons why taxation is complex There are strong pressures on tax systems to accommodate a range of important factors as well as complex and changing national and international environments within which modern tax systems have to operate This book explores the experiences of simplification in a range of countries and jurisdictions The authors analyse a range of manifestations of simplification including tax systems tax law taxpayer communications and tax administration They also review the longer term or more fundamental approaches to simplification suggesting that in order to strike the optimum balance between simplicity and the aims of a tax system in terms of efficiency and equity a range of complex environmental factors must all be taken into account With chapters reflecting on experiences from Australia China Canada Malaysia New Zealand Russia South Africa Thailand Turkey the UK and the US the authors illustrate differences between jurisdictions and the changing environment in which they operate This book addresses the crucial balance between simplicity and the other objectives of tax design and reform and suggests that reformers of the tax system should include simplicity as one of the key evaluators of any design or reform proposal

Taxation in the Digital Economy Nella Hendriyetty, Chris Evans, Chul Ju Kim, Farhad Taghizadeh-Hesary, 2022-07-11 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing processing analyzing and responding to information provided by taxpayers and others concerning taxpayers affairs By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs The full implications of the COVID 19 crisis are still too uncertain to predict but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances This in turn may shape the preference for and the nature of both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them This book will be a timely reference for those researching on taxation in digital economy and for policy makers The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license

Handbook of Behavioural Economics and Smart Decision-Making Morris Altman, 2017-05-26 This Handbook is a unique and original contribution of over thirty chapters on behavioural economics examining and addressing an important stream of research where the starting assumption is that decision makers are for the most part relatively smart or rational This particular approach is in contrast to a theme running through much contemporary work where individuals behaviour is deemed irrational biased and error prone often due to how

people are hardwired In the smart people approach where errors or biases occur and when social dilemmas arise more often than not improving the decision making environment can repair these problems without hijacking or manipulating the preferences of decision makers This book covers a wide range of themes from micro to macro including various sub disciplines within economics such as economic psychology heuristics fast and slow thinking neuroeconomics experiments the capabilities approach institutional economics methodology nudging ethics and public policy

Corporate Tax Base in the Light of the IAS/IFRS and EU Directive 2013/34: A Comparative Approach Mario Grandinetti, 2016-06-17 The recent relaunch of the European Commission s Common Consolidated Corporate Tax Base CCCTB project promises a sorely needed leap forward in the harmonization of the rules by which companies calculate their taxable profits In particular the initiative hopes to remedy the severe barrier to cross border business caused by the the accounting Tower of Babel by which companies tax bases are determined under national law This thorough analysis and commentary covers the influence of accounting rules on tax considering both generally accepted standards international accounting standards IAS and international financial reporting standards IFRS and EU Directive 2013 34 Three introductory chapters usher in detailed comparative overviews of the effect of these rules on taxation in nine EU Member States as well as in two other major EU trading partners the United States and Brazil Fully explaining the remarkable recent improvement in the comparability of accounts that represent favourable preconditions for creating a single market for financial services within the EU this book covers every relevant detail including the following and much more criterion of evaluation of alternative fixed assets based on revaluated amounts criterion based on fair value provisions applicable to income statements notes reports and financial statements rules applicable to the publication of documents transparency in payments to governments dispositions on exemptions hierarchy of general provisions and principles balance sheet and profit and loss account simplifications for small and medium sized enterprises SMEs system of creditors protection and protection of investors interests This book is a peerless explication of the taxation choices granted to Member States under IAS IFRS and EU Directive 2013 34 and how they will be affected by ongoing Commission initiatives Because relevant timely reliable and comparable information assumes a leading role in protecting the interests of investors creditors and other stakeholders as well as in ensuring that all operators act on a level playing field under equal conditions the analysis presented here is of immeasurable value to lawyers business persons and officials concerned with taxation not only in Europe but anywhere within the reach of international trade

Corruption from a Regulatory Perspective Maria De Benedetto, 2021-09-23 This book seeks to enrich and in some cases reverse current ideas on corruption and its prevention It is a long held belief that sanctions are the best guard against corrupt practice This innovative work argues that in some cases sanctions paradoxically increase corruption and that controls provide opportunities for corrupt transactions Instead it suggests that better regulation and responsive enforcement not sanctions offer the most effective response to corruption Taking both a theoretical and applied approach it examines the

question from a global perspective drawing on in particular a regulatory perspective to provide a model for tackling corrupt practices **Political Competition and the Study of Public Economics** Stanley L. Winer, J. Stephen Ferris, 2022-10-06

Why is an understanding of political competition essential for the study of public economics and public policy generally How can political competition be described and understood and how does it differ from its strictly economic counterpart What are the implications of the fact that policy proposals in a democracy must always pass a political test What are the strengths and weaknesses of electoral competition as a mechanism for the allocation of economic resources Why are tax structures in democratic polities so complicated and what implications follow from this for normative views about good policy choice How can the intensity of political competition be measured why and how does it vary in mature democracies and what are the consequences This Element considers how answers to these questions can be approached while also illustrating some of the interesting theoretical and empirical work that has been done on them
