Composition, Non-composition, 2012 Chinese Architecture and the Beaux-Arts Jeffrey W. Cody, Nancy Shatzman Steinhardt, Tony Atkin, 2011-01-31 In the early twentieth century Chinese traditional architecture and the French derived methods of the cole des Beaux Arts converged in the United States when Chinese students were given scholarships to train as architects at American universities whose design curricula were dominated by Beaux Arts methods Upon their return home in the 1920s and 1930s these graduates began to practice architecture and create China s first architectural schools often transferring a version of what they had learned in the U S to Chinese situations The resulting complex series of design related transplantations had major implications for China between 1911 and 1949 as it simultaneously underwent cataclysmic social economic and political changes After 1949 and the founding of the People s Republic China experienced a radically different wave of influence from the Beaux Arts through advisors from the Soviet Union who first under Stalin and later Khrushchev brought Beaux Arts ideals in the guise of socialist progress In the early twenty first century China is still feeling the effects of these events Chinese Architecture and the Beaux Arts examines the coalescing of the two major architectural systems placing significant shifts in architectural theory and practice in China within relevant contemporary cultural and educational contexts Fifteen major scholars from around the world analyze and synthesize these crucial events to shed light on the dramatic architectural and urban changes occurring in China today many of which have global ramifications This stimulating and generously illustrated work is divided into three sections framed by an introduction and a postscript The first focuses on the convergence of Chinese architecture and the cole des Beaux Arts outlining the salient aspects of each and suggesting how and why the two met in the U S The second section centers on the question of how Chinese architects were influenced by the Beaux Arts and how Chinese architecture was changed as a result The third takes an even closer look at the Beaux Arts influence addressing how innovative practices new schools of architecture and buildings whose designs were linked to Beaux Arts assumptions led to distinctive new paradigms that were rooted in a changing China By virtue of its scope scale and scholarship this volume promises to become a classic in the fields of Chinese and Western architectural history Contributors Tony Atkin Peter J Carroll Yung Ho Chang Jeffrey W Cody Kerry Sizheng Fan Fu Chao Ching Gu Daqing Seng Kuan Delin Lai Xing Ruan Joseph Rykwert Nancy S Steinhardt David VanZanten Rudolf Wagner Zhang Jie Zhao Chen *The Mathematics of the Ideal Villa and Other Essays* Colin Rowe, 1982-09-14 This collection of an important architectural theorist s essays considers and compares designs by Palladio and Le Corbusier discusses mannerism and modern architecture architectural vocabulary in the 19th century the architecture of Chicago neoclassicism and modern architecture and the architecture of utopia *Architectures of Bureaucracy* Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance While Belgium was strongly

influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts Such experts and scientists constituted a rising elite of homines novi with strong though often veiled political ambitions As such this book contributes to our understanding of political culture in the age of extremes **Reality Modeled**

After Images Michael Young,2021-08-30 Reality Modeled After Images Architecture and Aesthetics after the Digital Image explores architecture s entanglement with contemporary image culture It looks closely at how changes produced through technologies of mediation alter disciplinary concepts and produce political effects Through both historical and contemporary examples it focuses on how conventions of representation are established maintained challenged and transformed Critical investigations are conjoined with inquiries into aesthetics and technology in the hope that the tensions between them can aid an exploration into how architectural images are produced disseminated and valued how images alter assumptions regarding the appearances of architecture and the environment For students and academics in architecture design and media studies architectural and art history and related fields this book shows how design is impacted and changed by shifts in image culture representational conventions and technologies **Elements of Architecture** Pierre von Meiss,2013-11-13

Modernity has opened the way to a greater pluralism of forms But even if architecture is a cultural phenomenon that does not mean it is a product of fashion Its principles are enduring and its foundations less tangible than the novice who tried to shake them would realize To start that stretch towards the foundations one must first acquire the basics to know the permanence of the architectural field and appreciate the certainties tested by time This book will act as a guide for the reaching hand The first part explores the mediums of compositional architecture and the relationships between space light and place Four or five thousand years of history demonstrate the persistence of certain fundamental principles intrinsic to a discipline that organizes in three dimensions the vital space of man In the second part the author provides certain keys to manage the relationship between shape materials and construction recalling that the need to build by itself has never been enough to design the form of the house or the city Neither encyclopedia nor dictionary this book seeks to fill a gap in light of our time it serves as a contemporary introduction to architectural design and criticism Following the praise of critics the first edition has been adopted as a reference text in numerous schools and translated into several languages This new translation from the 3rd French edition offers revised and reworked content with an additional three chapters dedicated to tectonics

Henri Labrouste Henri Labrouste,Corinne Bélier,Barry Bergdoll,Marc Le Cœur,Martin Bressani,2012 Henri Labrouste

is one of the few nineteenth century architects consistently lionized as a precursor of modern architecture throughout the twentieth century and into our own time The two magisterial glass and iron reading rooms he built in Paris gave form to the idea of the modern library as a collective civic space His influence was both immediate and long lasting not only on the development of the modern library but also on the exploration of new paradigms of space materials and luminosity in places of great public assembly Published to accompany the first exhibition devoted to Labrouste in the United States and the first anywhere in the world in nearly 40 years this publication presents nearly 225 works in all media including drawings watercolors vintage and modern photographs film stills and architectural models Essays by a range of international architecture scholars explore Labrouste's work and legacy through a variety of approaches *Intersections of Space and Ethos* Kyriaki Tsoukala, Nikolaos-Ion Terzoglou, Charikleia Pantelidou, 2014-12-05 The pressing economic environmental and social crises emanate the need for a redefinition of the dominant views perspectives and values in the field of architecture The intellectual production of the last two decades has witnessed an impressive number of new design techniques and conceptual displacements reflecting the dynamic and fluid relation between man and his dwelling space However the contemporary market forces are favouring the growth of a star system in architectural production based on technological innovation spectacular imagery and formal acrobatics and are neglecting the social environmental and moral implications of spatial design Perhaps the time has come to think anew the possible critical intersections between space and ethos not only as an answer to the negative consequences of Modernity but also as a remedy to the negative aspects of globalisation The aim of the present collective volume is to enliven the ethical dimensions and dilemmas of architecture as they are shaped within the complexity of our times on two levels the level of critical and reflective discourse and the level of social and cultural reality occasioned by post industrial modes of production and new technologies Thirteen distinguished academics and researchers investigate the complex relations between architecture space and ethics from divergent and interdisciplinary perspectives philosophy sociology the humanities the arts landscape design environmental design urban design and architectural history and theory Understanding Architecture Leland M. Roth, Amanda C. Roth Clark, 2024-07-18 The widely acclaimed and beautifully illustrated *Understanding Architecture* is now revised and expanded in its fourth edition vividly examining the structure function history and meaning of architecture from prehistory to the present in ways that are both accessible and engaging Significant features of the fourth edition include Expanded global essays outlining the encounters and interchanges conflicts and accommodations between disparate global communities A brand new final chapter addressing the twenty first century during which Western and global architectural developments have increasingly become one broad interwoven expression This chapter includes sections on CAD Contemporary Architecture of the Twenty First Century Starchitects Contemporary Architectural Prizes Architecture and Energy Consumption and Architecture Integrated with Nature New sections on Frank Lloyd Wright and Late Twentieth Century Expressionism Thoroughly revised and

expanded illustration including over 700 images over half of which are in full color and 120 original line art drawings Understanding Architecture continues to be the only text in the field to examine architecture as a cultural phenomenon as well as an artistic and technological achievement with its straightforward two part structure The Elements of Architecture and the History and Meaning of Architecture Comprehensive and clearly written Understanding Architecture is both a primer for visual environmental literacy and a classic survey of architecture This is an essential book for anyone interested in our built environment and the layered historical meaning embodied within it **Le Corbusier, History and Tradition**

Armando Rabaça, 2017-05-01 The view of modernism as representing an epistemological break between technology and history and tradition has long been challenged Le Corbusier's work has proved to be an inexhaustible reference point in this debate This is due on the one hand to the legacy of nineteenth century historicism and on the other to his creative process of creation through destruction which as John Summerson has noted is comparable to the processes of avant garde poets and painters The contributions to this book explore particular episodes which bring to light both the operative role of the past in the creation of a new abstract synthesis and Le Corbusier's modernist historical consciousness They illustrate how the past participated in the modernist creative process of abstract art from the 1920s machine aesthetics to the late infatuation with myth They also shed light on the extent to which the operative quality of the history was framed by a comprehensive historical vision that took the form of metanarrative which neither the analytical studies on his architecture nor the synthetic approaches to his philosophical thinking should dismiss
