Composition With Pitch Classes A Theory Of Compositional Design:

Composition with Pitch-classes Robert Morris, 1987 A Theory of Music Analysis Dora A. Hanninen, 2012 This book introduces a theory of music analysis that one can use to explore aspects of segmentation and associative organization in a wide range of repertoire including Western classical music from the Baroque to the present with potential applications to jazz and popular music and some non Western musics Rather than a methodology the theory provides analysts with precise language and a broad flexible conceptual framework through which they can formulate and investigate questions of interest and develop their own interpretations of individual pieces and passages The theory begins with a basic distinction among three domains of musical experience and discourse about it the sonic psychoacoustic the contextual or associative sparked by varying degrees of repetition and the structural guided by a specific theory of musical structure or syntax invoked by the analyst A comprehensive presentation of the theory with copious musical illustrations is balanced with close analyses of works by Beethoven Debussy Nancarrow Riley Feldman and Morris Dora A Hanninen is professor of music theory at the University of Maryland She received the 2010 Outstanding Publication Award from the Society for Music Theory **Musical Motives** Brent Auerbach, 2021 The da da da DUM motive from Beethoven's Fifth Symphony is an undeniably evocative moment for any music fan Whether it be a first foray into classical music childhood piano lessons or the soundtrack to a beloved movie scene this is a moment not easily forgotten So what makes this and other musical motives so memorable In *Musical Motives* author Brent Auerbach looks at the ways that motives or the small scale pitch and rhythm shapes ever present in music tie musical compositions together and why we remember some more than others Musical motives function like motifs in visual art tying together sonic space They repeat frequently either as perfect copies or with slight variation With presence in all musical genres from classical and popular to jazz and world music motives are ideal tools for musical analysis Opening with an introduction to motives *Musical Motives* offers a new and universal system of motivic nomenclature then demonstrates how motives both in small and in expanded forms stretching over many measures help explain the structure and drama of musical works Taking amateurs and experts alike into consideration Auerbach provides two tiers of analytic method Basic and Complex Motivic Analysis To illustrate these methods he offers large scale analyses of pieces by Handel Beethoven Mozart Chaminade Radiohead and others *The Algorithmic Composer* David Cope, 2000-01-01 Accompanying disc contains Melody Predictor a program Compose a program Fun D j vu a program Backtalk some tutorials Alice an interactive program recorded performances of many of the works presented in the text and MIDI performances of most of the music in the figures Proceedings of the Worldwide Music Conference 2021 Ildar D. Khannanov, Roman Ruditsa, 2021-09-07 This Volume II of the Proceedings of the Worldwide Music Conference 2021 continues the line of publications of the first volume in a highly interdisciplinary mode This time we offer eight chapters that provide the in depth study of music in four large sub fields mathematics language and theory of narrative evolution and perception and finally

sociology The first chapter by Roman Ruditsa is devoted to the study of structural pitch organization This is based upon a formal logical interpretation of the idea of pitch The chapter contains formal definitions of such objects as tones intervals and interval systems and a demonstration of the logical relationships that exist between them The second chapter in the same mathematical venue by Celina Richter and Stefan E Schmidt revisits the millennial question of the essence of an interval using highly advanced mathematical language the categories of monoid and the algebraic theory of measurement The next block is dedicated to language and narrative the first chapter is by Vincent Meelberg Here the reader will find fascinating developments in the ongoing deliberations on this elusive category The name of Trevor Rawbone perhaps does not need an introduction to those involved with cognitive studies of music This time his chapter deals with the idea of the language of musical thought which shifts the traditional discussion of language into a very new dimension Carlos Almada begins a new section in the book the one dedicated to evolution and perception He begins with Darwin and takes us through the exciting path of development of the science of evolution which he masterfully connects to his model of derivative analysis of music The question of psycho physiological foundation of the ethnic hearing raised in the chapter by Ila V Toropova and Irina N Simakova is a difficult one The idea of ethnic character of music had been a part of traditional musicology and usually was expressed in specific language of humanities The chapter by Daniil Shutko on the theoretical ideas of the legendary professor of St Petersburg conservatory Dr Tatiana Bershadskaya was difficult to put into any category Her concept of music was truly universal and interdisciplinary At the same time the concept and Shutko's description are as closely focused on music theory in a narrow and precise sense as possible The art and culture of consumption of wine in correlation with the choice of music for listening is a theme for a true connoisseur It becomes even more intriguing when the authors Diego Pérez Fuertes Emma Juaneda Ayensa and Cristina Olarte Pascual add to the discussion the special circumstance of the pandemic and the way human spirit meets this challenge in the most graceful way

Serial Music and Serialism John D. Vander Weg, 2013-10-08 Serial or 12 tone music has proved to be an enduring 20th century style that has generated a wide range of writings This much needed work provides the only comprehensive up to date guide to research on serial music offering an annotated bibliography with nearly 500 citations from books and journals from 1950 to 1995

Schoenberg, Wittgenstein and the Vienna Circle James Kenneth Wright, 2007 In 2006 Schoenberg Wittgenstein and the Vienna Circle received a Lewis Lockwood Award Finalist from the American Musicological Society for outstanding new books on musicological topics This study examines relativistic aspects of Arnold Schoenberg's harmonic and aesthetic theories in the light of a framework of ideas presented in the early writings of Ludwig Wittgenstein the logician philosopher of language and Schoenberg's contemporary and Austrian compatriot The author has identified correspondences between the writings of Schoenberg the early Wittgenstein the Tractatus Logico Philosophicus in particular and the Vienna Circle of philosophers on a wide range of topics and themes Issues discussed include the nature and limits of language musical universals theoretical conventionalism

word to world correspondence in language the need for a fact and comparison based approach to art criticism and the nature of music theoretical formalism and mathematical modeling Schoenberg and Wittgenstein are shown to have shared a vision that is remarkable for its uniformity and balance one that points toward the reconciliation of the positivist relativist dualism that has dominated recent discourse in music theory Contrary to earlier accounts of Schoenberg's harmonic and aesthetic relativism this study identifies a solid epistemological core underlying his thought a view that was very much in step with Wittgenstein and the Vienna Circle and thereby with the most vigorous and pivotal developments in early twentieth century intellectual history

Concert Music, Rock, and Jazz Since 1945 Elizabeth West Marvin, 2002 Presents various interdisciplinary articles to bridge the gulf between classical and popular music

A Question of Balance Taylor Aitken Greer, 2023-12-22 One of this century's most influential musical intellects takes center stage in Taylor Greer's meticulously wrought study of Charles Seeger 1886-1979 Seeger left an indelible mark in the fields of musicology music criticism ethnomusicology and avant garde musical composition but until now there has been no extended appreciation and critique of Seeger's work as a whole nor has an accessible guide to his texts been available Exploring the entire corpus of Charles Seeger's writing *A Question of Balance* highlights the work of those persons who most influenced him especially Henri Bergson Bertrand Russell and Ralph Perry Invited to inaugurate the music department at the University of California's Berkeley campus in 1912 Seeger became keenly aware of his deficiencies in general education and put himself on a rigorous regimen of intellectual development that included studying history anthropology political theory and philosophy For the remainder of his life his ideas about music heavily influenced the development of ethnomusicology and systematic musicology Charles Seeger is perhaps best known as the father of the folk singers Pete Seeger and Peggy Seeger and as the husband of the innovative American composer Ruth Crawford This book makes clear that Seeger was an extremely important thinker and educator in his own right Seeger's intellectual curiosity was as eclectic as it was enthusiastic and Greer skillfully weaves together the connections Seeger made between music the humanities and the sciences The result is a luminous tapestry depicting Seeger's ideal schemes of musicology At the same time it reflects the turbulence and vitality in American musical life during the early decades of the century One of this century's most influential musical intellects takes center stage in Taylor Greer's meticulously wrought study of Charles Seeger 1886-1979 Seeger left an indelible mark in the fields of musicology music criticism ethnomusicology and avant
