Compressed Sensing For Magnetic Resonance Image Reconstruction:

Compressed Sensing for Magnetic Resonance Image Reconstruction Angshul Majumdar, 2015-02-26 Discusses different ways to use existing mathematical techniques to solve compressed sensing problems Provided by publisher Compressed Sensing Magnetic Resonance Image Reconstruction Algorithms Bhabesh Deka, Sumit Datta, 2018-12-29 This book presents a comprehensive review of the recent developments in fast L1 norm regularization based compressed sensing CS magnetic resonance image reconstruction algorithms Compressed sensing magnetic resonance imaging CS MRI is able to reduce the scan time of MRI considerably as it is possible to reconstruct MR images from only a few measurements in the k space far below the requirements of the Nyquist sampling rate L1 norm based regularization problems can be solved efficiently using the state of the art convex optimization techniques which in general outperform the greedy techniques in terms of quality of reconstructions Recently fast convex optimization based reconstruction algorithms have been developed which are also able to achieve the benchmarks for the use of CS MRI in clinical practice This book enables graduate students researchers and medical practitioners working in the field of medical image processing particularly in MRI to understand the need for the CS in MRI and thereby how it could revolutionize the soft tissue imaging to benefit healthcare technology without making major changes in the existing scanner hardware It would be particularly useful for researchers who have just entered into the exciting field of CS MRI and would like to quickly go through the developments to date without diving into the detailed mathematical analysis Finally it also discusses recent trends and future research directions for implementation of CS MRI in clinical practice particularly in Bio and Neuro informatics applications *Compressed Sensing Magnetic Resonance Image Reconstruction Algorithms* Sumit Datta, 2019 This book presents a comprehensive review of the recent developments in fast L1 norm regularization based compressed sensing CS magnetic resonance image reconstruction algorithms Compressed sensing magnetic resonance imaging CS MRI is able to reduce the scan time of MRI considerably as it is possible to reconstruct MR images from only a few measurements in the k space far below the requirements of the Nyquist sampling rate L1 norm based regularization problems can be solved efficiently using the state of the art convex optimization techniques which in general outperform the greedy techniques in terms of quality of reconstructions Recently fast convex optimization based reconstruction algorithms have been developed which are also able to achieve the benchmarks for the use of CS MRI in clinical practice This book enables graduate students researchers and medical practitioners working in the field of medical image processing particularly in MRI to understand the need for the CS in MRI and thereby how it could revolutionize the soft tissue imaging to benefit healthcare technology without making major changes in the existing scanner hardware It would be particularly useful for researchers who have just entered into the exciting field of CS MRI and would like to quickly go through the developments to date without diving into the detailed mathematical analysis Finally it also discusses recent trends and future research directions for implementation of CS MRI in clinical practice particularly in Bio

Magnetic Resonance Image Reconstruction Mehmet Akcakaya, Mariya Ivanova Doneva, Claudia Prieto, 2022-11-04 Magnetic Resonance Image Reconstruction Theory Methods and Applications presents the fundamental concepts of MR image reconstruction including its formulation as an inverse problem as well as the most common models and optimization methods for reconstructing MR images The book discusses approaches for specific applications such as non Cartesian imaging under sampled reconstruction motion correction dynamic imaging and quantitative MRI This unique resource is suitable for physicists engineers technologists and clinicians with an interest in medical image reconstruction and MRI Explains the underlying principles of MRI reconstruction along with the latest research Gives example codes for some of the methods presented Includes updates on the latest developments including compressed sensing tensor based reconstruction and machine learning based reconstruction

Regularized Image Reconstruction in Parallel MRI with MATLAB Joseph Suresh Paul, Raji Susan Mathew, 2019-11-05 Regularization becomes an integral part of the reconstruction process in accelerated parallel magnetic resonance imaging pMRI due to the need for utilizing the most discriminative information in the form of parsimonious models to generate high quality images with reduced noise and artifacts Apart from providing a detailed overview and implementation details of various pMRI reconstruction methods Regularized image reconstruction in parallel MRI with MATLAB examples interprets regularized image reconstruction in pMRI as a means to effectively control the balance between two specific types of error signals to either improve the accuracy in estimation of missing samples or speed up the estimation process The first type corresponds to the modeling error between acquired and their estimated values The second type arises due to the perturbation of k space values in autocalibration methods or sparse approximation in the compressed sensing based reconstruction model Features Provides details for optimizing regularization parameters in each type of reconstruction Presents comparison of regularization approaches for each type of pMRI reconstruction Includes discussion of case studies using clinically acquired data MATLAB codes are provided for each reconstruction type Contains method wise description of adapting regularization to optimize speed and accuracy This book serves as a reference material for researchers and students involved in development of pMRI reconstruction methods Industry practitioners concerned with how to apply regularization in pMRI reconstruction will find this book most useful

Compressed Sensing for Engineers Angshul Majumdar, 2018-12-07 Compressed Sensing CS in theory deals with the problem of recovering a sparse signal from an under determined system of linear equations The topic is of immense practical significance since all naturally occurring signals can be sparsely represented in some domain In recent years CS has helped reduce scan time in Magnetic Resonance Imaging making scans more feasible for pediatric and geriatric subjects and has also helped reduce the health hazard in X Ray Computed CT This book is a valuable resource suitable for an engineering student in signal processing and requires a basic understanding of signal processing and linear algebra Covers fundamental concepts of compressed sensing Makes subject matter accessible

for engineers of various levels Focuses on algorithms including group sparsity and row sparsity as well as applications to computational imaging medical imaging biomedical signal processing and machine learning Includes MATLAB examples for further development
