Developing Intelligent Agent Systems A Practical Guide:

Developing Intelligent Agent Systems Lin Padgham, Michael Winikoff, 2005-06-24 Build your own intelligent agent system Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce to autonomous space probes This powerful technology is not widely used however as developing intelligent agent software requires high levels of training and skill The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems With this methodology Prometheus developers can start agent oriented designs and implementations easily from scratch saving valuable time and resources *Developing Intelligent Agent Systems* not only answers the questions what are agents and why are they useful but also the crucial question how do I design and build intelligent agent systems The book covers everything a practitioner needs to know to begin to effectively use this technology including an introduction to the notion of agents a description of the concepts involved and a software engineering methodology Read on for a practical step by step introduction to designing and building intelligent agent systems a full life cycle methodology for developing intelligent agent systems covering specification analysis design and implementation of agents PDT Prometheus Design Tool software support for the Prometheus design process the example of an electronic bookstore to illustrate the design process throughout the book Electronic resources including the Prometheus Design Tool PDT can be found at <http://www.cs.rmit.edu.au/agents/prometheus> This book is aimed at industrial software developers software engineers and at advanced undergraduate students It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics Familiarity with Java will help in reading the examples in chapter 10 **Agent-Oriented Software**

Engineering VIII Michael Luck, Lin Padgham, 2008-04-29 Software architectures that contain many dynamically interacting components each with its own thread of control engaging in complex coordination protocols are difficult to correctly and efficiently engineer Agent oriented modelling techniques are important for the design and development of such applications This book provides a diverse and interesting overview of the work that is currently being undertaken by a growing number of researchers in the area of Agent Oriented Software Engineering This volume constitutes the thoroughly refereed proceedings of the 8th International Workshop on Agent Oriented Software Engineering AOSE 2007 held in Honolulu Hawaii in May 2007 as part of AAMAS 2007 The 16 revised full papers were carefully selected from numerous submissions during two rounds of reviewing and improvement The volume contains the papers presented at the workshop together with papers resulting from discussions on tools and platforms The papers have been organized into four sections on methodology and processes interacting heterogeneous agents system development issues and tools and case studies *The Agent Modeling Language - AML* Radovan Cervenka, Ivan Trencansky, 2007-04-17 Multi agent systems have been a focus of studies for more than 25

years Yet despite substantial effort of an active research community modeling of multi agent systems still lacks complete and proper definition general acceptance and practical application This book provides the Agent Modeling Language AML a comprehensive modeling language as an extension of UML 2.0 concentrating on multi agent systems and applications

Handbook of Research on Multi-Agent Systems: Semantics and Dynamics of Organizational Models Dignum, Virginia, 2009-03-31 This book provides a comprehensive view of current developments in agent organizations as a paradigm for both the modeling of human organizations and for designing effective artificial organizations Provided by publisher

Agent-Oriented Software Engineering X Marie-Pierre Gleizes, Jorge J. Gomez-Sanz, 2011-03-14 This volume constitutes the thoroughly refereed post conference proceedings of the 10th International Workshop on Agent Oriented Software Engineering AOSE 2009 held in Budapest Hungary in May 2009 as part of AAMAS 2009 the 8th International Conference on Autonomous Agents and Multiagent Systems The 10 revised full papers presented were carefully selected from numerous initial submissions during two rounds of reviewing and improvement The papers have been organized into three sections on multi agent organizations concrete development techniques and one step higher going beyond the concrete technique and proposing a development method for designing concrete types of systems This state of the art survey is rounded off by five additional lectures addressing key areas in development agent oriented modelling languages implementation of MAS testing of MAS software processes and formal methods for the development of MAS They permit analysis of the current state in the generation of specifications of MAS the way these specifications can be implemented how they can be validated and what steps are necessary to do so
