Ensor, 2021-04-23 *Securitizing Youth* offers new insights on young people's engagement in a wide range of contexts related to the peace and security field. It presents empirical findings on the challenges and opportunities faced by young women and men in their efforts to build more peaceful, inclusive and environmentally secure societies. The chapters included in this edited volume examine the diversity and complexity of young people's engagement for peace and security in different countries across the globe and in different types and phases of conflict and violence, including both conflict-affected and relatively peaceful societies. Chapter contributors, young peacebuilders and seasoned scholars and practitioners alike, propose ways to support youth's agency and facilitate their meaningful participation in decision-making. The chapters are organized around five broad thematic issues that correspond to the 5 Pillars of Action identified by UN Security Council Resolution 2250. Lessons learned are intended to inform the global youth peace and security agenda so that it better responds to on-the-ground realities, hence promoting more sustainable and inclusive approaches to long-lasting peace.      *Other People's Kids* Peter C. Scales, 2012-12-06 According to the study conducted by Gallup Organization, only a minority of Americans experience consistent normative motivation for engaging with other people's children. Social norms theory suggests that adults are more likely to get deeply involved if that involvement is viewed as highly important and if they perceive a social expectation to do so. This volume examines the nature of social norms in general and in relationship to children and adolescents. The book examines the complex dynamics of understanding the appropriate roles of parents and other adults in young people's healthy development. The volume also presents the study's findings in detail, including numerous areas of consensus among American adults, differences among American adults, and the gap between perceived importance and actual engagement. A wide-ranging literature synthesis suggests implications for both personal and collective actions with potential to change norms that inhibit engagement and to strengthen values that encourage engagement.      **Adolescents on Music** Elizabeth Cassidy Parker, 2020 Many can attest to the importance of the self-growth that occurs for young people through the arts and their accompanying communities of support, understanding and caring. Yet even professionals who work daily with adolescents and parents or guardians who raise adolescents sometimes have difficulty collectively articulating why musicking experiences are important for young people. In *Adolescents on Music*, author Elizabeth Cassidy Parker proves that this challenge stems from failing to ask adolescents to share their ideas richly and fully. Accordingly, Parker argues for deeper efforts to connect adolescent perspectives with established theories and philosophies in the social sciences and humanities. Organized into three sections: Who I Am, My Social Self and Toward a Future Vision, Parker seeks new and diverse perspectives from the young people sharing their voices and experiences in each chapter. Chapters begin with a description from adolescents in their own words of the music they make, the meanings they ascribe to their music-making and contributions to their development. The voices highlighted in these chapters come from adolescent solo musicians, autonomous and vernacular

players composers school and community music makers and listeners between the ages of 12 20 By familiarizing readers with the multiplicity of adolescent music making experiences and perspectives discussing relevant theories within and outside of music and music education that support adolescent musical and personal growth promoting adolescent health and well being and greater understanding of young people and providing a common language toward advocacy for adolescent music making Adolescents on Music serves as an invaluable resource for individual and group music teachers and practitioners parents of adolescents music mentors and music education students

**Metacognitive Approaches to Developing Oracy** Roy Evans, Deborah Jones, 2013-09-13 The acquisition of speech and language represent significant achievements for all children These aspects of child development have received substantial attention in the research literature and a considerable body of theoretical knowledge exists to chart progress from infancy to maturity Cross cultural studies have identified the common purposes served by the acquisition of oral language by children and the essential similarity in the sequence through which speech develops irrespective of geography and culture What is less clear is precisely how children learn to say what they mean and how teachers and parents can support and enhance the development of meaningful speech in their children Until now children s speech has been underused as a means of promoting learning in the formal school setting New requirements within the National Curriculum are trying to address this gap but there remains a lack of clarity as to what this means for practice and how it relates to the broad base of curricular objectives This book brings together a body of work from different countries it offers an improved understanding of how strategies for developing speaking and listening may impact metacognitive awareness and raise standards of literacy and dialogic thinking for all children This book was previously published as a special issue of Early Child Development and Care
