Clean Tech Intellectual Property Eco Marks Green Patents And Green Innovation:

Clean Tech Intellectual Property Eric L. Lane,2013-06-01

Clean Tech Intellectual Property Eric L. Lane,2013

Green Innovations and IPR Management Andree Kirchner,Iris Kirchner-Freis,2013-03-01 There can no longer be any doubt that promoting green innovations is essential if we are to meet the challenges of sustainable development climate change and intergenerational equity With the maturity of this crucial awareness has come full recognition of the intellectual property rights of green innovators an area of international law that has drawn a host of initiatives not only from lawyers and legal scholars but also from highly knowledgeable and well placed authorities such as the World Intellectual Property Organization the European Patent Office the United Nations Environment Program the International Tribunal for the Law of the Sea the International Centre for Trade and Sustainable Development the European Commission and national environmental agencies In this first ever survey and analysis of the current and emerging state of the field twenty two outstanding practitioners academics policymakers and officials describe the relevant work of all of these groups Among the array of topics covered are the following vast diversity of products services and processes legacy IP measures from R role of green technology s moral underpinning wide open startup vs exorbitant up front cost and licensing issues in technology transfer Although primarily intended for professionals concerned with the legal aspects of green technology lawyers policymakers agency officials academics this book will also be of great value to inventors and technology companies as a guide to mechanisms for managing and sharing intellectual property rights in the context of green innovations It is sure to engage a wide audience for years to come

Innovation and Diffusion of Green Technologies: The Role of Intellectual Property and Other Enabling Factors World Intellectual Property Organization,2015-06-10 An overview of issues relevant to debates about solutions to global challenges such as climate change public health and food security

The Elgar Companion to Intellectual Property and the Sustainable Development Goals Matthew Rimmer,Caroline B. Ncube,Bita Amani,2024-02-12 Complex geopolitical debate surrounds the role of intellectual property IP in advancing and achieving the UN s Sustainable Development Goals SDGs Summarising and advancing this discourse this prescient Companion is a thorough examination of how IP law interacts influences and impacts each of the seventeen SDGs

Patent Law, Green Technology and Innovation Ankit Singh,Yogendra Srivastava,2022-09-19 In the era of modern industrial regimes the role of technology in tackling climate change is pivotal International goals of climate change mitigation and sustainable development cannot be achieved without the contribution of new technologies At the same time the importance of patent protection and an efficient patent system that facilitates technology transfer among international frontiers cannot be overlooked Many patented technologies are either not accessible for further dissemination or do not hold much technical value Therefore advanced systems of collaborative innovation have been developed especially in the sector of green technology and green innovation The environmental concerns of the global community cannot be tackled by a single company

person sector or country Innovation partnerships and collaborative research will play a vital role in combating global climate concerns and in determining the diffusion of green technologies for maximum impact This book argues that policy makers should encourage partnerships in technology rather than focusing on gaining investment and access to green technology to encourage global technological giants to transfer their technology and knowledge to local entities It analyzes the relationship between patent protection green innovation and diffusion of green technology against the backdrop of climate change and severe climate crisis Taking an interdisciplinary approach to align patent law and green technology with the Sustainable Development Goals it examines the effects of patent protection technology transfer and compulsory licensing on the diffusion of green technologies while offering a systematic analysis of the relationship between patent protection green innovation and diffusion of green technology from a global perspective *Intellectual Property and Clean Energy* Matthew

Rimmer,2018-10-26 This collection considers the future of climate innovation after the Paris Agreement It analyses the debate over intellectual property and climate change in a range of forums including the climate talks the World Trade Organization and the World Intellectual Property Organization as well as multilateral institutions dealing with food health and biodiversity The book investigates the critical role patent law plays in providing incentives for renewable energy and access to critical inventions for the greater public good as well as plant breeders rights and their impact upon food security and climate change Also considered is how access to genetic resources raises questions about biodiversity and climate change This collection also explores the significant impact of trademark law in terms of green trademarks eco labels and greenwashing The key role played by copyright law in respect of access to environmental information is also considered The book also looks at deadlocks in the debate over intellectual property and climate change and provides theoretical policy and practical solutions to overcome such impasses **Intellectual Property and Climate Change** Matthew

Rimmer,2011-11-01 An historically grounded study on a cutting edge topic Intellectual Property and Climate Change has it all Not only is it well written concise and hugely informative it is also a timely intervention addressing truly global challenges Quite simply a must read Eva Hemmungs Wirtén Uppsala University Sweden Rimmer provides a much needed well written authoritative book on the intellectual property aspects of climate change natural disasters clean vehicles and renewable energy The book is essential reading for those wishing to better understand the complex patent issues involved with transitioning away from our current fossil dominated economy to a more environmentally sustainable and equitable energy future Benjamin K Sovacool National University of Singapore In the wake of the international summits in Copenhagen and Cancun there is an urgent need to consider the role of intellectual property law in encouraging research development and diffusion of clean technologies to mitigate and adapt to the effects of climate change This book charts the patent landscapes and legal conflicts emerging in a range of fields of innovation including renewable forms of energy such as solar power wind power and geothermal energy as well as biofuels green chemistry green vehicles energy efficiency and smart grids As well as

reviewing key international treaties this book provides a detailed analysis of current trends in patent policy and administration in key nation states and offers clear recommendations for law reform It considers such options as technology transfer compulsory licensing public sector licensing and patent pools and analyses the development of Climate Innovation Centres the Eco Patent Commons and environmental prizes such as the L Prize the H Prize and the X Prizes This book will have particular appeal to policy makers given its focus upon recent legislative developments and reform proposals as well as legal practitioners by developing a better understanding of recent legal scientific and business developments and how they affect their practice Innovators scientists and researchers will also benefit from reading this book

Research Handbook on Climate Change and Trade Law Panagiotis Delimatsis, 2016-12-30 The interaction between climate change and trade has grown in prominence in recent years This Research Handbook contains authoritative original contributions from leading experts working at the interface between trade and climate change It maps the state of affairs in such diverse areas as carbon credits and taxes sustainable standard setting and trade in green goods and services or investment from both a regional and global perspective Panagiotis Delimatsis redefines the interrelationship of trade and climate change for future scholarship in this area

Ethical Values and the Integrity of the Climate Change Regime Hugh Breakey, Vesselin Popovski, 2016-05-23 This book investigates the ethical values that inform the global carbon integrity system and reflects on alternative norms that could or should do so The global carbon integrity system comprises the emerging international architecture being built to respond to the climate change This architecture can be understood as an integrity system an inter related set of institutions governance arrangements regulations and practices that work to ensure the system performs its role faithfully and effectively This volume investigates the ways ethical values impact on where and how the integrity system works where it fails and how it can be improved With a wide array of perspectives across many disciplines including ethicists philosophers lawyers governance experts and political theorists the chapters seek to explore the positive values driving the global climate change processes to offer an understanding of the motivations justifying the creation of the regime and the way that social norms impact upon the operation of the integrity system The collection focuses on the nexus between ideal ethics and real world implementation through institutions and laws The book will be of interest to policy makers climate change experts carbon taxation regulators academics legal practitioners and researchers
