Climate Change Governance Climate Change Management:

Climate Change Governance Jörg Knieling, Walter Leal Filho, 2012-07-30 Climate change is a cause for concern both globally and locally In order for it to be tackled holistically its governance is an important topic needing scientific and practical consideration Climate change governance is an emerging area and one which is closely related to state and public administrative systems and the behaviour of private actors including the business sector as well as the civil society and non governmental organisations Questions of climate change governance deal both with mitigation and adaptation whilst at the same time trying to devise effective ways of managing the consequences of these measures across the different sectors Many books have been produced on general matters related to climate change such as climate modelling temperature variations sea level rise but to date very few publications have addressed the political economic and social elements of climate change and their links with governance This book will address this gap Furthermore a particular feature of this book is that it not only presents different perspectives on climate change governance but it also introduces theoretical approaches and brings these together with practical examples which show how main principles may be implemented in practice *Climate Change in Cities* Sara Hughes, Eric K. Chu, Susan G. Mason, 2017-09-27 This book presents pioneering work on a range of innovative practices experiments and ideas that are becoming an integral part of urban climate change governance in the 21st century Theoretically the book builds on nearly two decades of scholarships identifying the emergence of new urban actors spaces and political dynamics in response to climate change priorities However it further articulates and applies the concepts associated with urban climate change governance by bridging formerly disparate disciplines and approaches Empirically the chapters investigate new multi level urban governance arrangements from around the world and leverage the insights they provide for both theory and practice Cities both as political and material entities are increasingly playing a critical role in shaping the trajectory and impacts of climate change action However their policy planning and governance responses to climate change are fraught with tension and contradictions While on one hand local actors play a central role in designing institutions infrastructures and behaviors that drive decarbonization and adaptation to changing climatic conditions their options and incentives are inextricably enmeshed within broader political and economic processes Resolving these tensions and contradictions is likely to require innovative and multi level approaches to governing climate change in the city new interactions new political actors new ways of coordinating and mobilizing resources and new frameworks and technical capacities for decision making We focus explicitly on those innovations that produce new relationships between levels of government between government and citizens and among governments the private sector and transnational and civil society actors A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi level urban climate change governance Debra Roberts Co Chair Working Group II IPCC 6th Assessment Report AR6 and Acting Head Sustainable and Resilient City Initiatives Durban

South Africa Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are Christopher Gore Associate Professor and Chair Department of Politics and Public Administration Ryerson University Canada This book is a rare and welcome contribution engaging critically with questions about cities as central actors in multilevel climate governance but it does so recognizing that there are lessons from cities in both the Global North and South Harriet Bulkeley Professor of Geography Durham University United Kingdom This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world from California to Canada India to Indonesia Governing Climate Change Jolene Lin, 2018-06-21 Cities are no longer just places to live in They are significant actors on the global stage and nowhere is this trend more prominent than in the world of transnational climate change governance TCCG Through transnational networks that form links between cities states international organizations corporations and civil society cities are developing and implementing norms practices and voluntary standards across national boundaries In introducing cities as transnational lawmakers Jolene Lin provides an exciting new perspective on climate change law and policy offering novel insights about the reconfiguration of the state and the nature of international lawmaking as the involvement of cities in TCCG blurs the public private divide and the traditional strictures of domestic versus international This illuminating book should be read by anyone interested in understanding how cities in many cases more than the countries in which they re located are addressing the causes and consequences of climate change **Climate Change Governance and Adaptation** Anamika Barua, Vishal Narain, Sumit Vij, 2018-08-29 Climate change adaptation in South Asia is redefining the roles of different actors in the governance processes The existing governance lack capacity knowledge and leadership skills to manage the uncertainties and challenges posed by climate change This book aims to explain how the governance of climate change adaptation and mitigation is being shaped in the region and how climate change is impacting upon the governance of natural resources Although the focus is on South Asia the editors draw a wide range of contributions from northern and southern communities and across various agro ecological contexts Climate Change Governance and Adaptation Case Studies from South Asia sees the changing climate not only as an environmental problem but as a societal challenge and discusses the governance challenges from an interdisciplinary social science perspective across different levels local state and national Discusses also the challenges and opportunities for increasing the resilience of the society through effective governance around climate change A top down approach to govern climate change adaptation may not yield desired outcomes instead the book emphasizes the need to integrate issues of equity into climate governance and policies The lessons learned from different cases across South Asia help readers have a better and deeper understanding of the relationships between governance and climate change Given the diversity of themes covered this book will appeal not only to researchers and practitioners in the climate change community but also to those with a broader interest in governance processes **Climate Change Management** Huong Ha, 2018-02-13 This book

focuses on special issues of climate change management in Asia It discusses the challenges of climate change governance and examines the impact of climate change on agriculture and food security The author includes a rare work relating to a new dimension of climate change management environmental knowledge management The book also touches another special topic relating to climate change legal issues in the maritime sector Is the current maritime legal framework effective in preventing harms to the environment still a big question How the legal industry in Malaysia responds to climate change is also examined in this volume Finally the agriculture sector in Japan investigates whether the adaptive method of introducing high temperature tolerant varieties and the mitigation strategy affect the product price of rice Overall robust strategies plans and policies are required to provide directions to stakeholders so that they can effectively and efficiently respond to climate change challenges

Transformative Climate Governance Katharina Hölscher, Niki Frantzeskaki, 2020-08-26 How to progress climate science to be policy relevant and actionable This book presents a novel framework to give a positive vision and structuring approach to guide research and practice on transformative climate governance to shift the narrative from apathy and stalemate to action and transformation Our vision contrasts existing climate governance and associated lock ins that signify the institutional resistance to change To effectively address climate change climate governance itself needs to be transformed to foster sustainability transitions under climate change The book brings together a collection of case studies to investigate how capacities for transformative climate governance are developing at multiple scales and how they can be strengthened vis vis existing governance regimes Specifically it sheds light on the following questions What are key overarching conditions actors and activities that facilitate governance for transformation under climate change Given persistent climate governance lock ins what needs to happen in research and policy to build up the capacities that transform climate governance and ensure effective climate action

Climate Change Seema Rani, Rajesh Kumar, 2022-03-07 This book provides the world community with the most up to date and comprehensive scientific and technical knowledge based on climate change impact assessment adaptation and mitigation strategies in the Indian Himalayan region It identifies major issues related to climate change on environmental sustainability focusing on impact measurement policy adaptation and mitigation strategies at national regional and local scales There is a need to strengthen the global response in order to cope with the threat of climate change The main objective of this book is to update the understanding of scientific analysis and to promote evidence based policy formulation at regional and local levels This book on climate change is used as a reference material to climate change for new learners interested in the mountainous region of the Indian Himalayas This comprehensive book covers a wide range of potential research areas including climate change scenarios science and its applications adaptation to climate change theory and assessment water resources agriculture human health forest biodiversity ecosystems indigenous knowledge etc
