Clinical Drug Therapy Rationales For Nursing Practice Field Guide:

Clinical Drug Therapy Anne Collins Abrams, Carol Barnett Lammon, Sandra Smith Pennington, 2007 This popular core nursing pharmacology textbook provides unique coverage of nursing interventions for drug therapy with related rationales. Highly praised for its organized and readable presentation, the text explains the why behind each nursing action and emphasizes how drugs work differently in different patients. New to the Eighth Edition are case studies integrated into each chapter with case-based questions that foster critical thinking. New Research Briefs summarize current research and its nursing implications. A new chapter covers drugs for obesity and all nutrition products have been consolidated into one chapter. New NCLEX-style questions appear at the end of each drug chapter. Abrams' Clinical Drug Therapy Geraldyn Frandsen, Sandra Pennington, 2023-11-28 Abrams' Clinical Drug Therapy Rationales for Nursing Practice 13th Edition continues to guide students and instructors through safe and effective medication administration. Expert pharmacology educators and clinicians explain the why behind each nursing action and emphasize individualized nursing care and drug therapy to promote optimal outcomes in every care setting. Extensively updated with clinical judgment case studies in each section for NCLEX preparation, this 13th Edition makes essential information accessible and engaging to ensure success in the classroom on the NCLEX exam and throughout clinical practice. Covering both med/surg and psychiatric/mental health conditions and disorders, it addresses your role in a variety of care settings, emphasizes culturally competent care and holistic nursing, and thoroughly covers all relevant NCLEX/PN Test Plan content. Abundant real-life case studies clearly show how to apply what you've learned to clinical practice. Features separate chapters on common high-profile disorders including hypertension, diabetes, and shock, providing an in-depth understanding for patient care. Offers foundational units on basic concepts related to the health care system, care settings, the nursing process, leadership, nutrition, the older adult, growth and nutrition, legal/ethical considerations, evidence-based nursing care, and many more essential topics, avoiding repetition later in the text. Includes a separate comprehensive unit on the older adult and related disorders. No other LPN/LVN med/surg text has as much coverage of this primary patient group. Includes a separate comprehensive unit on psychosocial responses to illness, psychiatric disorders, and substance abuse, eliminating the need for a separate psychiatric/mental health nursing text.
