Climate Change Ethics And Human Security:

Climate Change, Ethics and Human Security Karen O'Brien, Asunción Lera St. Clair, Berit Kristoffersen, 2010-07-22
Presenting human security perspectives on climate change this volume raises issues of equity ethics and environmental justice as well as our capacity to respond to what is increasingly considered to be the greatest societal challenge for humankind Written by international experts it argues that climate change must be viewed as an issue of human security and not an environmental problem that can be managed in isolation from larger questions concerning development trajectories and ethical obligations towards the poor and to future generations The concept of human security offers a new approach to the challenges of climate change and the responses that could lead to a more equitable and sustainable future *Climate Change Ethics and Human Security* will be of interest to researchers policy makers and practitioners concerned with the human dimensions of climate change as well as to upper level students in the social sciences and humanities interested in climate change

Climate Change, Ethics and Human Security Karen O'Brien, 2010 Approaches climate change as an issue of human security and ethical obligation arguing for a more equitable and sustainable future

Handbook on Climate Change and Human Security Michael R Redclift, Marco Grasso, 2013-10-31 The Handbook is international in scope and provides an assessment that will be of value to academics students and policy professionals alike NGOs and policy institutes which need a grasp of the specificity and range of the issues and problems will all

Sustainability, Capabilities and Human Security Andrew Crabtree, 2020-02-28 Amartya Sen and Martha Nussbaum have made major contributions to development studies and social philosophy yet sustainability issues have largely remained outside their domain despite sustainability's significance and complex relation to their central value of freedom This volume explores sustainability from a capabilities perspective with the motif of human security inviting a lively discussion within the human development family After introducing the two approaches authors conceptualize relationships between capabilities and the environment examine the scientific and normative validity of environmental indicators and analyse intergenerational justice Climate change is used to exemplify that a human security approach can add an explanatory ontology to the ethical criticisms of contemporary ways of life that champion consumerism That ontology recognizes shared life experiences problems and life challenges a community of fate The volume ends with a discussion of how the approaches can inform and sometimes critique the Sustainable Development Goals

Global Environmental Change and Human Security Richard A. Matthew, Jon Barnett, Bryan McDonald, Karen L. O'Brien, 2009-10-09 Experts discuss the risks global environmental change poses for the human security including disaster and disease violence and increasing inequity In recent years scholars in international relations and other fields have begun to conceive of security more broadly moving away from a state centered concept of national security toward the idea of human security which emphasizes the individual and human well being Viewing global environmental change through the lens of human security connects such problems as melting ice caps and carbon emissions to poverty

vulnerability equity and conflict This book examines the complex social health and economic consequences of environmental change across the globe In chapters that are both academically rigorous and policy relevant the book discusses the connections of global environmental change to urban poverty natural disasters with a case study of Hurricane Katrina violent conflict with a study of the decade long Nepalese civil war population gender and development The book makes clear the inadequacy of traditional understandings of security and shows how global environmental change is raising new unavoidable questions of human insecurity conflict cooperation and sustainable development Contributors W Neil Adger Jennifer Bailey Jon Barnett Victoria Basolo Hans Georg Bohle Mike Brklacich May Chazan Chris Cocklin Geoffrey D Dabelko Indra de Soysa Heather Goldsworthy Betsy Hartmann Robin M Leichenko Laura Little Alexander Lopez Richard A Matthew Bryan McDonald Eric Neumayer Kwasi Nsiah Gyabaah Karen L O'Brien Marvin S Soroos Bishnu Raj Upreti **Global Pandemic and**

Human Security Rajib Shaw, Anjula Gurtoo, 2022-03-01 This book highlights how the human security aspect has been affected by the global pandemic based on the specific case study field data and evidence COVID 19 has exemplified that the pandemic is global but its responses are local The responses depend on national governance and policy framework use of technology and innovation and people's perceptions and behavior among many others There are many differences in how the pandemic has affected the rich and the poor urban and rural sectors development and fiscal sectors and developed and developing nations and communities Echoing human security principles the 2030 Agenda emphasized a world free of poverty hunger disease and want free of fear and violence with equitable and universal access to quality education health care and social protection to safe drinking water and sanitation where food is sufficient safe affordable and nutritious where habitats are safe resilient and sustainable and where there is universal access to affordable reliable and sustainable energy These basic human security PA1 principles and development agenda are highly affected by the global pandemic worldwide irrespective of its development and economic status Thus the book highlights the nexus between human security and development issues It has two major pillars one is the development and the other is technology issues These two inter dependent topics are discussed in the perspective of the global pandemic making this the most important feature of this book While the world is still in the middle of a pandemic and possibly other natural and biological hazards may affect people's lives and livelihoods in the future this book provides some key learning which can be used to cope with future uncertainties including climate risks Thus the book is timely and relevant to wider readers Environmental Change and Human Security

in Africa and the Middle East Mohamed Behnassi, Katriona McGlade, 2017-01-17 This volume brings together insights on the interactions between environmental change and human security in the Middle East and Africa These regions face particular challenges in relation to environmental degradation the decline of natural resources and consequent risks to current and future human security The chapters provide topical analysis from a range of disciplines on the theory discourse policy and practice of responding to global environmental change and threats to human security Case studies from Morocco Tunisia

Egypt Turkey Iraq and Syria provide empirical evidence with a focus section dedicated to the critical issue of water resources and water security in the region The contributions demonstrate above all that the risks posed to human security arise through multiple and interconnected processes operating across diverse spatial and temporal scales The complexity of these processes requires new ways of thinking and intervening As a contribution the current volume provides engaging insights from theory and practice for those seeking to address the challenges of environmental change *A Changing Environment for Human Security* Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security *A Changing Environment for Human Security* Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice *Routledge Handbook of Human Security* Mary Martin, Taylor Owen, 2013-11-07 This Handbook will serve as a standard reference guide to the subject of human security which has grown greatly in importance over the past twenty years Human security has been part of academic and policy discourses since it was first promoted by the UNDP in its 1994 Human Development Report Filling a clear gap in the current literature this volume brings together some of the key scholars and policy makers who have contributed to its emergence as a mainstream concept including Nobel prize winner Amartya Sen and Sadako Ogata who jointly chaired the 2001 Commission on Human Security Drawing upon a range of theoretical and empirical analyses the Handbook provides examples of the use of human security in policies as diverse as disaster management arms control and counter terrorism and in different geographic and institutional settings from Asia to Africa and the UN It also raises important questions about how the concept might be adapted and operationalised in future Over the course of the book the authors draw on three key aspects of human security thinking Theoretical issues to do with defining human security as a specific discourse Human security from a policy and institutional perspective and how it is operationalised in different policy and geographic contexts Case studies and empirical work Featuring some of the leading scholars in the field the *Routledge Handbook of Human Security* will be essential reading for all students of human security critical security conflict and development peace and

conflict studies and of great interest to students of international security and IR in general Human Security and Natural Disasters Christopher Hobson, Paul Bacon, Robin Cameron, 2014-03-26 Human security is an approach that rejects the traditional prioritization of state security and instead identifies the individual as the primary referent of security. It offers a way of broadening our perspective and recognizing that the most pressing threats to individuals do not come from interstate war but from the emergencies that affect people every day such as famine, disease, displacement, civil conflict, and environmental degradation. Human security is about people living their lives with dignity, being free from fear and want. To date, there has been a strong tendency to focus on insecurity caused by civil conflict with less attention on issues to do with environmental security. This volume addresses the threat posed by natural disasters which represent an increasingly major human security threat to people everywhere. In looking at natural disasters, this book also refines the human security approach. It does so through developing its previously unexplored interdisciplinary potential. This volume explicitly seeks to bring the human security approach into conversation with contributions from a range of disciplines: development, disaster, sociology, gender studies, international law, international relations, philosophy, and public health. Collectively, these scholars unpack the human element of natural disasters. In doing so, an emphasis is placed on how pre-existing vulnerabilities can be gravely worsened as well as the interconnected nature of human security threats. The book presents a variety of case studies that include the Indian Ocean tsunami, Hurricane Katrina, the 2010 Haiti earthquake, and the 2011 triple disasters in Japan.
